

# Ordinateur

The diagram illustrates the internal components of a computer, organized into three main functional areas. On the left, a light blue shaded region contains the 'Unité centrale de traitement' (Central Processing Unit), which is further divided into the 'Unité de contrôle' (Control Unit) and the 'Unité arithmétique et logique' (Arithmetic and Logic Unit). In the center, a tall vertical rectangle represents the 'Mémoire' (Memory). On the right, two separate blocks represent the 'Entrées' (Inputs) and 'Sorties' (Outputs).
